Building a Better Tomorrow...

Bengaluru, Karnataka | 1 – 3 Years Experience

1. COMPANY OVERVIEW

About Our Company

Vignesh Anugraha Enterprises is a Bengaluru-based proprietorship engaged in construction-related contracting, material supply, installation and project execution. We support clients with practical, coordinated solutions across civil construction, renovation, infrastructure and building services.

Our approach is built around understanding the site requirement, defining the scope clearly, arranging suitable materials and skilled resources, and executing the work with attention to quality, safety and schedule.

We aim to serve as a single-point execution partner for clients who value responsive coordination and accountable delivery—from initial site assessment and estimation through procurement, installation, finishing and handover.

Our Vision

To become a trusted construction and infrastructure solutions partner, recognised for dependable execution, transparent coordination and lasting workmanship.

Our Mission

To deliver fit-for-purpose construction solutions through responsible material selection, competent workmanship, disciplined project coordination and a commitment to client requirements.

Our Values

Integrity Clear communication and responsible commitments.	**Quality** Appropriate materials and careful workmanship.
Safety Safe work practices and site discipline.	**Accountability** Ownership from scope clarification to handover.

2. WHAT WE DO

Our Services

We undertake a broad range of construction and building improvement activities. The exact scope, specifications, quantities and execution methodology are confirmed project by project.

Civil Construction

RCC and concrete works, masonry, plastering, repairs, foundations and associated civil works.

Material Supply & Installation

Procurement, supply, delivery, handling and installation of approved construction materials and components.

Renovation & Refurbishment

Building upgrades, alteration works, repair, replacement, finishing and space improvement.

Plumbing & Electrical

Water supply, drainage, sanitary installation, electrical wiring, fixtures and associated services through suitable personnel.

Infrastructure Works

Roads, pathways, parking areas, stormwater drains, external development and site improvement works.

Interior Works

Flooring, tiling, painting, partitions, doors, ceilings and other interior finishing activities.

Structural Fabrication

MS fabrication, gates, railings, supports, sheds, roofing and installation of fabricated components.

Sports Infrastructure

Sports courts, practice areas, playing surfaces, fencing, nets and related civil/fabrication works.

Building Maintenance

Preventive and corrective repairs, facility upkeep, plumbing, electrical and civil maintenance.

3. HOW WE DELIVER

Project Execution & Delivery

Our delivery model is designed to maintain clarity at every stage of a project and to coordinate materials, manpower and site activities efficiently.

01 Understand the requirement

Site visit, client discussion, review of drawings and identification of constraints.

02 Define the scope

Measurements, quantity assessment, BOQ preparation, specifications and clarification of inclusions/exclusions.

03 Plan resources

Work sequencing, manpower planning, procurement schedule, equipment and site arrangements.

04 Supply & execute

Procurement of approved materials, delivery coordination, installation and work execution.

05 Inspect & close

Quality checks, snag rectification, cleaning, documentation and handover.

Typical project documentation

a. Site measurement records, BOQs and scope clarifications.

b. Material submittals, delivery records and relevant product information.

c. Work schedules, progress updates and site photographs, where required.

d. Inspection records, snag lists, completion documents and handover records.

4. WHERE WE WORK

Client & Project Sectors

We are positioned to support a range of built-environment requirements, subject to project scope, technical suitability and agreed commercial terms.

SECTOR	POTENTIAL REQUIREMENTS
Educational institutions	Classroom and facility renovation, washrooms, sports infrastructure, drainage, painting and maintenance.
Commercial buildings	Civil works, interior fit-outs, building services, refurbishment and external development.
Residential properties	Repairs, renovation, waterproofing, flooring, plumbing, electrical and finishing works.
Industrial & institutional sites	Utility areas, fabrication, flooring, drainage, maintenance and infrastructure improvements.
Builders & project consultants	BOQ-based contracting, material supply, installation and defined work packages.

Our Operating Strengths

a. Integrated coordination of material procurement, supply and installation.

b. BOQ-based scope definition and quantity-oriented estimation.

c. Coordination with clients, consultants, vendors and site teams.

d. Flexible execution support for individual work packages and multi-trade projects.

e. Focus on practical solutions, workmanship and completion documentation.

Note: Services involving specialised design, statutory approvals or licensed trades are undertaken through appropriately qualified professionals and subject to applicable approvals.

5. OUR COMMITMENT

Quality, Safety & Responsible Execution

We recognise that quality and safety are essential to reliable project delivery. Our working approach is to establish clear specifications, use suitable materials and maintain supervision appropriate to the nature of the work.

Quality practices

a. Confirm drawings, specifications, samples and scope before execution.

b. Use materials matching approved specifications and applicable standards.

c. Carry out checks at key stages and address identified defects or snags.

d. Maintain relevant product warranties, test reports and material records where applicable.

Health & safety practices

e. Identify site hazards and communicate safe work methods before starting activities.

f. Use suitable personal protective equipment and barricading/signage as required.

g. Maintain housekeeping and safe access around active work areas.

h. Coordinate hot work, work at height, electrical isolation and other higher-risk activities with suitable controls and permissions.

Environmental and site care

i. Plan material storage and debris handling to minimise disruption.

j. Dispose of construction waste through appropriate authorised channels as applicable.

k. Protect existing finishes, services and occupied areas during execution.

> **Our commitment**
>
> We strive to complete every agreed scope with clear communication, responsible site practices and a professional handover.

7. WORKING WITH US

Engagement & Commercial Approach

We welcome enquiries for clearly defined construction, renovation, supply and installation packages. Each proposal is prepared against the client's requirements and the available technical information.

Typical engagement process

a. Receive enquiry, drawings, specifications or a brief description of the requirement.

b. Arrange a site visit and clarify measurements, access, working hours and execution constraints.

c. Submit a BOQ / quotation with scope, quantities, specifications, rates, taxes and exclusions as applicable.

d. Agree on work order, payment terms, programme, material approvals and responsibilities.

e. Execute, inspect, rectify snags and submit completion / handover documents.
